[hello@camilalins.co](mailto:hello@camilalins.co)

## EXPERIENCE

### Full-stack developer & UX/UI designer

Freelance, 2014 – Present

From client relations to deployment, I plan, design and develop fully interactive and animated websites, focusing on user experience, accessibility, and optimization; for clients like Women's Music Event, No Ar Coquetel Molotov, The Kilos Project, DJ Anna, Grupo VB, Instituto Mondó, Holos, among others.

### Full-stack developer

Cappen, 2018 – 2020

Responsible for all things WordPress related, creating fully customized themes and plugins, for a wide range of projects, and worldwide clients.

### Front-end developer

Cumbuca, 2014 – 2015

Working on large and small scale blogs, government sites, and out-of-the-box advertising campaigns.

### Front-end developer

Fishy, 2011 – 2014

With a focus on interactive and animated experiences, I developed responsive and accessible solutions for very varied applications, from huge intranets, to landing pages, and touchscreen totems...

### Front-end developer

Cappen, 2010 – 2011

Putting in practice everything I learned while designing and coding templates as a hobby since '04. Left to live and study in San Francisco for a while.

Unibratec, Recife

## LANGUAGES

English, fluent

Portuguese, native

Japanese, basic

## BEYOND

With over 15 years of experience, I've always loved computers and writing code, figuring out the logic and workings of things, and trying to make my own. Together with a love for art, I grew up drawing, creating, and experimenting; learning new things and challenging myself.

Let's chat and get to know each other!
